Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the questions whether the claims are fully supported by the description, are made:

Claims 5 and 13 are objected to as lacking clarity under PCT Rule 66.2(a)(v) because the claims are not fully supported by the description. The application, as originally filed, did not describe: a system where all system modules are software modules as recited in claim 13. Certain ones of the claimed modules would need to be actual circuit elements particularly those working in the analog domain. Claim 5 seems it should depend from claim 3 rather than claim 1.
